Final Rejection (RCE)

Telephone Interview

1. In telephone interview conducted on 01/05/2004, Applicant agrees on the following amendment:

- In claim 1, lines 2; --magnetic read/write-- is inserted before "head."
- In claim 18, line 1; --for protecting a magnetic read/write head assembly circuit from electrostatic discharge-- is inserted before "comprising."

Examiner also requires further amending claim 21 as follows:

- In claim 21, line 1; --for protecting a magnetic read/write head assembly circuit from electrostatic discharge-- is inserted after "device."

To confirm the agreed and required amendments, Applicant is required in the Office action mailed on 01/12/2004 to include the above amendments in the next response; however, the correction does not appear in Amendment filed on 04/12/2004.

Applicant is required again to include the above amendments in the next response in the Office action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2652

2. Claims 18 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Johansen (US 5,963,415).

With regard to claims 18 and 19, Johansen shows a protection device as described above, which includes: means for electrically communicating with a circuit to be protected; and means for reversibly shorting a portion of the circuit to be protected by lifting means 56 for electrically communicating relative to the circuit 16 during operation of the device so as to separate the means for electrically communicating and the circuit, and returning the means for electrically communicating from the lifted position relative to the circuit to a position in which the means for electrically communicating and the circuit are electrically connected; a pair of electrical contacts that are moveable from a first position in which the electrical contacts are in electrical communication with the circuit to be protected to a second position in which the electrical contacts are not in electrical communication with the circuit to be protected.

Allowable Subject Matter

3. Claims 1-10 and 21 are allowed.

Claim 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

- With regard to claim 1, Johansen (US 5,963,415) shows an electrostatic discharge protection device for protecting magnetic read/write head assembly

Art Unit: 2652

having a shunt, the shunt has a first position and second position, **but fails to show** that the second position is within the housing.

Applicant's invention would keeps the communicating means functioning in the device all the time.

- With regard to claims 20 and 21, as the closest reference, Johansen (US 5,963,415) shows an electrostatic discharge protection device for protecting magnetic read/write head assembly having a deshunting pin, but fail to show a deshunting rail.

Applicant's rail can be moved manually or moved by a mechanical testing apparatus between the shunted and unshunted positions (Specification, p. 7, lines 13-15).

Response to Arguments

4. Applicant's arguments filed 04/12/2004 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the features recited above) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
